PROFILE SUMMARY

Data Scientist who actively practices data science, analytics, and AI engineering through hands-on work, self-initiated projects, and continuous online training. I independently build dashboards, develop AI tools and automations, and analyze complex datasets to sharpen my technical skills. I am seeking a role that enables daily application and sustained upskilling in data, machine learning, and AI-driven problem solving.

WORK EXPERIENCE

TaskUs

Jun 2024 - Ongoing

AI Operations & Human Data

- Translate fast-changing client policies into production-grade labeling rules, examples, and SOPs for large-scale RLHF pipelines.
- De-facto Subject Matter Expert; resolve complex edge cases and drive cross-geo alignment through weekly calibrations.
- Deliver high-impact pilots under extreme time pressure, including:
 - GAIA-style adversarial prompt datasets (Gemini, multimodal & reasoning stress-tests)
 - Mathematics-based reasoning pilot completed solo in one day (secured new client)
 - 3D asset & metadata pilot (Blender workflows, textures, hierarchies) by reverse-engineering client intent
- Build and maintain a live Google Sheets analytics platform tracking label drift, policy hot-spots, chat engagement, and misalignment signals; used directly in calibrations and QA reviews.
- Design synthetic Human Data datasets modeling disagreement patterns, severity drift, and throughput vs accuracy trade-offs; perform statistical analysis for leadership insights.
- Provide structured model feedback to improve safety coverage, policy precision, and FP/FN balance; maintain consistently top-tier QA performance.
- Selected for all high-stakes pilots due to rapid comprehension, technical depth, and operational reliability.

Self – Employed / Cramming Schools

Sep 2007 - Ongoing

Mathematics Tutor

As a self-employed mathematics tutor, I assist students in achieving their academic goals by leveraging a deep understanding of mathematical concepts and addressing their individual needs. Through my long experience teaching in cramming schools, I gained valuable experience managing tight schedules, collaborating with colleagues, and consistently delivering excellent results in demanding environments.

LANGUAGES

Greek (Native), English (C2), French (B2)

EDUCATION

Master of Science (MSc), Data Science & Machine Learning

2025

Hellenic Open University

Grade : 9.98/10

Bachelor of Science (BSc), Mathematics

2014

University of Ioannina

Independent AI Engineering & Automation Projects

- **Virtual-Me RAG Chatbot (www.ppaltsokas.com)**
Built and deployed a retrieval-augmented chatbot acting as a live CV and project explorer, using document ingestion, embeddings, and Dockerized deployment.
- **AI Photo Library (Multimodal Retrieval)**
Created an image indexing and semantic search system allowing natural-language queries over personal photo collections.
- **AI News Automation (n8n + Discord)**
Built a workflow that aggregates AI news from multiple sources, processes them, and publishes curated updates to a Discord server via bot integration.
- **GAIA-style Dataset Engineering**
Designed adversarial prompt sets and evaluation logic to benchmark LLM reasoning, factuality, and tool-use failure modes.

CERTIFICATIONS

- Hugging Face AI Agents Course, Hugging Face (2025)
- Large Language Models: Application Through Production, edX & Databricks (2024)
- 100 Days of Code: The Complete Python Pro Bootcamp, Udemy (2024)
- R Programming A-Z: R for Data Science, Udemy (2023)
- 15 Days of SQL: The Complete SQL Masterclass, Udemy (2023)

TECHNICAL SKILLS

- Python, R, SQL, (basic) C++
- scikit-learn, TensorFlow, Keras, Hugging Face Transformers
- Decision Trees, Random Forests, SVM, RNN, CNN, Ensemble Learning
- Exploratory Data Analysis, Data Preprocessing, Feature Engineering
- Dimensionality Reduction, Clustering, Supervised & Unsupervised Learning, Reinforcement Learning from Human Feedback
- matplotlib, Seaborn, Plotly, Tableau, Power BI
- Jupyter Notebook, Google Colab, PyCharm, Cursor

CORE STRENGTHS

- Strong work ethic, analytical, structured, and result-driven
- Equal parts of team player and natural team leader
- Strong communicator, offering guidance, and support alignment within teams
- Approach challenges with optimism and resilience, maintaining focus and adaptability in fast-paced environments
- Rapid learner with deep problem-solving mindset
