PROFILE SUMMARY

Data Scientist who actively practices data science, analytics, and AI engineering through hands-on work, self-initiated projects, and continuous online training. I independently build dashboards, develop AI tools and automations, and analyze complex datasets to sharpen my technical skills. I am seeking a role that enables daily application and sustained upskilling in data, machine learning, and AI-driven problem solving.

WORK EXPERIENCE

TaskUs

Jun 2024 - Ongoing

AI Operations & Human Data

- Translate fast-changing client policies into production-ready labeling workflows, delivering updates under tight timelines while keeping SLAs on track.
- Act as de-facto Subject Matter Expert, resolving complex edge cases and driving cross-geo alignment through regular calibration sessions.
- Provide structured model feedback to improve safety coverage, policy precision, and FP/FN balance, maintaining consistently top-tier QA performance.
- Build and maintain a live analytics dashboard tracking label drift, policy hot-spots, chat engagement, and misalignment signals, used directly in calibrations.
- Partner with QAs, team leads, and clients to translate ambiguous requirements into clear rules, examples, and SOP updates.
- Trusted contributor on high-stakes, time-critical initiatives due to rapid comprehension, technical depth, and operational reliability.
- Continuous development through completion of internal Team Leader Preparatory Academy and Data Science Preparatory Academy.

Self – Employed / Cramming Schools

Sep 2007 - Ongoing

Mathematics Tutor

As a self-employed mathematics tutor, I assist students in achieving their academic goals by leveraging a deep understanding of mathematical concepts and addressing their individual needs. Through my long experience teaching in cramming schools, I gained valuable experience managing tight schedules, collaborating with colleagues, and consistently delivering excellent results in demanding environments.

EDUCATION

Master of Science (MSc), Data Science & Machine Learning

2025

Hellenic Open University
Grade : 9.98/10

Bachelor of Science (BSc), Mathematics

2014

University of Ioannina

Independent AI Engineering & Automation Projects

- **Virtual-Me RAG Chatbot (www.ppaltsokas.com)**
Built and deployed a retrieval-augmented chatbot acting as a live CV and project explorer, using document ingestion, embeddings, and Dockerized deployment.
- **AI Photo Library (Multimodal Retrieval)**
Created an image indexing and semantic search system allowing natural-language queries over personal photo collections.
- **AI News Automation (n8n + Discord)**
Built a workflow that aggregates AI news from multiple sources, processes them, and publishes curated updates to a Discord server via bot integration.
- **GAIA-style Dataset Engineering**
Designed and implemented an AI agent as part of the Hugging Face AI Agents course, focusing on tool orchestration, retrieval-augmented generation (RAG), multi-step reasoning, and robust answer validation on challenging benchmark-style tasks.

CERTIFICATIONS

- Hugging Face AI Agents Course, Hugging Face (2025)
- Large Language Models: Application Through Production, edX & Databricks (2024)
- 100 Days of Code: The Complete Python Pro Bootcamp, Udemy (2024)
- R Programming A-Z: R for Data Science, Udemy (2023)
- 15 Days of SQL: The Complete SQL Masterclass, Udemy (2023)

TECHNICAL SKILLS

- Python, R, SQL, (basic) C++
- TensorFlow, Keras, scikit-learn, Hugging Face Transformers
- Decision Trees, Random Forests, SVM, RNN, CNN, Ensemble Learning
- Exploratory Data Analysis, Data Preprocessing, Feature Engineering
- Dimensionality Reduction, Clustering, Supervised & Unsupervised Learning, Reinforcement Learning from Human Feedback
- matplotlib, Seaborn, Plotly, Tableau, Power BI
- Jupyter Notebook, Google Colab, PyCharm, Cursor

CORE STRENGTHS

- Strong work ethic, analytical, structured, and result-driven
- Equal parts of team player and natural team leader
- Strong communicator, offering guidance, and support alignment within teams
- Approach challenges with optimism and resilience, maintaining focus and adaptability in fast-paced environments
- Rapid learner with deep problem-solving mindset

LANGUAGES

Greek (Native), English (C2), French (B2)
